## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 19-24 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6,471,872 to Kitaevich et al. Kitaevich discloses a renal function replacement apparatus which may perform hemofiltration, hemodialysis, or ultrafiltration (see column 2, lines 45-63). The apparatus monitors patient parameters which may include patient cardiac output, or oxygen saturation in the blood, and that signal is compared to a predetermined value and used to control the fluid pumping rates in the system (see column 3, lines 50-55, column 4, lines 28-37). The system further comprises a blood withdrawal tube 14, blood reinfusion tube 30, filter 24, filtrate output section 64 and pump 66, a biosensor 140, and a controller 12 (see column 6, generally, column 7, lines 21-35, column 9, lines 16-25).

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Art Unit: 3762

- a. US 5,536,237 Prince et al
  - i. Blood extraction flow control system and method
- b. US 5,725,776 Kenley et al
  - ii. Feedback control of hemodialysis
